

First setup android sdk, use the following guideline:

http://www.howtogeek.com/125769/how-to-install-and-use-abd-theandroid-debug-bridge-utility/

In the System Settings find the Developer options.If there isn't the option or the options not show,see step2 to enable the Developer options

s	Settings							
	Device							
	Ψ	USB	•	Display				
	٠	Sound & notification	:	Storage				
	Ť	Apps	±	Users				
	Person							
	ô	Security		Accounts				
		Language & input	٥	Backup & reset				
	System	1						
	©	Date & time	÷	Printing				
	0	Developer options	0	About device				

In system settings.find the About device->Build number and click on the Build number box seven times.

		Ð	7:42 PM
÷	About device		۹
	Status Status of the bluetooth, network, and other information		
	Legal information		
	Model number ZIDOO_X6 Pro		
	Android version 5.1.1		
	Baseband version Unknown		
	Kernel version 3.10.0 xiaoweihua@Zidoobeta #16 Mon Mar 7 16:33:38 CST 2016		
	Build number rk3368_box-userdebug 5.1.1 LMY48G eng.xiaoweihua.20160316.093853 test-keys		
	You are now 3 steps away from being a developer.		

The Developer options will display on Settings now.

						7:43 PM	
Se	Settings						
	Device						
	Ψ	USB	ø	Display			
	۰	Sound & notification		Storage			
	ĕ	Apps	÷	Users			
	Personal						
	ô	Security	8	Accounts			
	۲	Language & input	4	Backup & reset			
	System	1					
	0	Date & time	÷	Printing			
	0	Developer options	()	About device			

Open USB debugging and click OK.

You can access the adb options now,(if it doesn't work yet,please reopen the USB debugging again).
