

ZIDOO X6 Pro provides 3 power modes for the power key, please read the tips to create shortcuts to shut down, restart or sleep.

The default settings of the power key notice the following pop-up dialog:

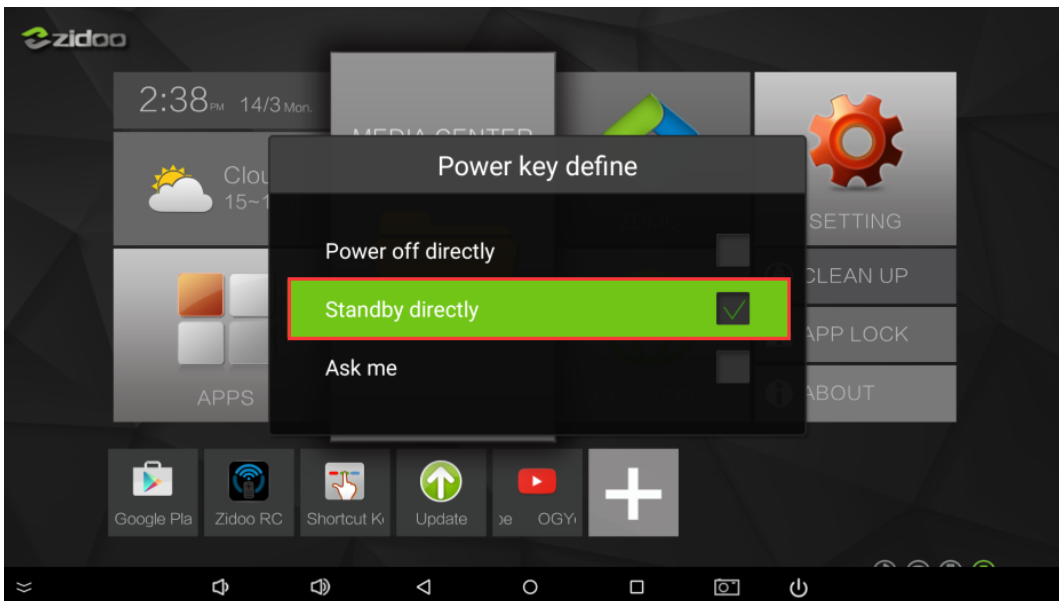

Press and Hold the Power key in 3 seconds to bring up to the "Power key define" pop-up.

Select power off directly to shut down the system where click on the power key.

Select stand by directly enter in sleep mode when click in the power key.

Select ask me to set power timer.

Select the first button "Power off" and scroll up/down to set a timer to shut down the system.

Select the second button "Standby" and up/down to set a timer have the system suspend/hibernate.

Select the "Reboot" to restart your box.
